## Design

The Hallite 51 is a heavy duty piston seal which, when installed in pairs, provides an excellent double acting piston design. It is particularly suitable for difficult operating conditions such as pressure surging, vibration or some misalignment.

The seal is an assembly of three parts, a male adaptor, a V ring and a female adaptor. Both the V ring and the female adaptor are made from rubberised fabric which has durability and strength, it also retains lubricant at the sliding surfaces so friction and wear are kept to a minimum. The V ring being the primary seal is more flexible than the adaptor which supports it and prevents extrusion damage. At higher pressures the adaptor deforms and becomes a secondary seal.

The polyacetal male adaptor has grooves across the face to ensure pressure is evenly applied to the V ring.

## Technical details

## Operating conditions

Maximum Speed
Temperature Range
Maximum Pressure

## Maximum extrusion gap

Pressure bar
Maximum Gap mm
Pressure p.s.i.

## Surface roughness

Dynamic Sealing Face $\emptyset \mathrm{Dd}_{1}$ Static Sealing Face $\emptyset \mathrm{d}_{1}$ Static Housing Faces $L_{1}$

## Chamfers \& Radii

Groove Section $\leq \mathrm{S} \mathrm{mm}$
Min Chamfer C mm
Max Fillet Rad $r_{1} \mathrm{~mm}$

## Tolerances

mm

| Metric |
| :--- |
