DOUBLE-LIPPED | POLYURETHANE | METAL-
CASED | DESIGNED FOR POPULAR ASIAN SIZES

WIPER | DOUBLE-LIPPED | POLYURETHANE | METAL-CASED | DESIGNED FOR POPULAR ASIAN SIZES

869

The Hallite 869 double-lipped, metal-cased wiper is designed to press fit into open groove housings of popular Asian housing sizes for a wide range of applications and for use with venting U-rings, such as the Hallite 663 or Hallite 673 rod seal.

The polyurethane wiping element is bonded to a nitrided metal case eliminating the potential for rust. The polyurethane wiping element has a precision trimmed sealing lip to collect the fluid passing the rod seal. The wiping lip is specially profiled to provide improved dry rod performance, particularly for long stroking cylinder applications.

The proportions of the polyurethane wiping lip follow the side movement of the rod to clear away heavily deposited dirt and make this wiper an excellent choice for dirty conditions.

The Hallite 869 also has an outside sealing lip to prevent the ingress of water between the metal case and the housing.

The Hallite 869 is moulded in Hythane® 361, Hallite's high-performance polyurethane, for excellent durability in service.

FEATURES

- Fits popular Asian housing sizes
- Nitrided metal case provides maximum corrosion resistance
- Precision trimmed sealing lips ensures drier sealing system
- Specially profiled wiper lip for improved leakage control
- Outside sealing lip to prevent ingress of water
- Long life and long wear
